

CORPORATE SOCIAL RESPONSIBILITY REPORT

Corporate Social Responsibility Report

I am pleased to present this report highlighting the activities of Noor Financial Investment Company (Noor) related to its social responsibility and serving society.

Noor gives high importance to social responsibility and has placed it on top of its priorities as part of a plan that is directed to serve society along with various development initiatives. One of the Company's significant principles is to enhance its social role and strengthen the private sector's relation with the local community thorough providing support to various educational, medical, and environmental activities and initiatives among others. This is based our profound belief on the importance of this role to support the development journey in the State of Kuwait.

1. Supporting needing families inside Kuwait project

The year 2021 was full of challenges due to the prevailing major events due to the COVID 19 pandemic for a second consecutive year that impacted the various aspects of life, including economic and social aspects as well. However, Noor strongly continued its humane contributions and supporting the different social communities.

In this context, we contributed – under the oversight of Sheikh Abdullah Al Nouri Charity – to support needing families inside the State of Kuwait by funding those families and medical patients helping them to provide themselves with their basic needs. We also funded various primary school students to continue their educational journey.

Sheikh Abdullah Al Nouri Charity Project

2. Contributions to educate needing students and orphans' campaign

Our belief that education is a basic human right and its importance in enhancing individuals and developing society, as children are the new generation and the promising future and that we must secure a better future for them. Noor contributed to an education campaign under the oversight of the Kuwaiti Red Crescent Society that collects donations to pay all related educational expenses for orphans and needing children in the State of Kuwait.

Vastly, what we presented during 2021, was a part of our human obligation and its responsibility towards our community and our beloved country. We will continue our endeavors supported by our Board of Directors and staff efforts to enrich our initiatives commensurate our ambitions and vision becoming more impactful and to cover the requirements of a larger portion of society.
